SECTION II: SUMMARY OF ISSUE DOCUMENT

OVERVIEW OF INDUSTRY

Coal Trading Industry in India

India's domestic coal production increases by 28% as of June 16, 2022

After a record-breaking coal production of 777 million tonnes (MT) in 2021-22, domestic coal production continues to witness an increasing trend in the current financial year as well.

The total domestic coal production in 2022-23, as of May 31, 2022, is 137.85 MT, which is 28.6 per cent more as compared to the production of 104.83 MT in the same period of last year. This trend is being maintained in June, 2022 also, the Ministry of Coal said today.

The coal production by Coal India Ltd (CIL) is 28 per cent more than the production in the same period of the previous year (as of June 16, 2022). The Domestic coal production target for the current financial year is 911 MT which is 17.2 per cent more than the previous year.

The coal imports for blending by the Domestic Coal Based (DCB) power plants have dropped to 8.11 MT in the year 2021-22 which has been the lowest coal import in the last eight years. This was possible solely due to the robust coal supply from domestic sources and increased domestic coal production. The Imported Coal Based (ICB) power plants had imported coal of more than 45 MT per year from 2016-17 to 2019-20. However, coal import by the ICB power plants dropped to the lowest level of 18.89 MT in 2021-22 and the generation from these plants also dropped to 39.82 billion units (BU) in the year 2021-22 as compared to the 100+ BU which these plants have been generating since quite some time. This year too their generation remains very low due to high price of imported coal.

In the last five years, the coal-based power generation has grown at a CAGR of 1.82 per cent whereas the domestic coal supply to power sector had grown at a CAGR of 3.26 per cent. Thus, coal supply to power sector has outpaced the growth in coal-based power generation and continues to do so in the present year too.

In the year 2021-22, coal supply from CIL to the DCB power plants has been more than the supply required to be made under Fuel Supply Agreement (FSA). CIL had supplied 540 MT coal, out of which 483 MT coal was supplied against FSA. This coal was sufficient for the power plants to run at 69 per cent PLF whereas the DCB power plants operated at a PLF of only 61.3 per cent in the year 2021-22. In the year 2022-23, as per FSA, CIL was supposed to supply 120.67 MT coal to its linked power plants (at 85 per cent PLF) whereas CIL had supplied 129.58 MT coal (till 16.06.22). This supply is 7.4 per cent more than the supply required by the plants if they operate at 85 per cent PLF. The plants have operated at about 70 per cent PLF and the CIL coal supply to its FSA-linked plants is 30.4 per cent more than their requirement.

With increased production, the rake supply from CIL to the power sector has also been at an all-time high. The rake loading to power sector increased from 215.8 rakes per day in 2020-21 to 271.9 rakes per day in 2021-22, registering a growth of 26 per cent.

*To the extent quantifiable excluding interest and penalty thereon

Directors excluding Promoters.

The above mention data is as on filing of Draft Prospectus i.e. August 19, 2022

2. *Our company derives significant revenue from trading coal.*

Our Company is engaged in the business of buying and selling of coal. We import almost all our coal from international market. Our company is not engaged in any other activity other than trading of coal, so our entire revenue is based on trading of Coal. As on a date of filing of this Prospectus, our company only trade in coal. Coal is a commodity and its price is based on supply and demand. There can be shortage of coal and can be abundance of it and based on this, there are fluctuations in the rates of coal at international market. If our company is unable add new products to our business operation we would be corned to a single product and any disruption in its operations would cause a significant impact on our operations. Also, if our company fails to tackle the price fluctuations it would may cause a loss to our company.

3. *Fluctuation in prices, non-availability or high cost of quality of coal may have an adverse effect on our business, results of operations and financial condition.*

Timely procurement of coal, as well as the quality and the price at which they are procured, play an important role in the successful operation of our business. An increase in the price of gold and silver may result in an increase in our income from sales assuming such increases do not adversely affect sales volumes. However, a significant increase in the price gives a negative outlook on future of coal prices could, in the short term, adversely affect our sales volumes and increase our procurement costs. The prices and supply of these materials depend on factors beyond our control, including general

economic conditions, competition, production levels and regulatory factors such as import duties. However, such increase has not resulted in an increase in our operational cost since any increases in the prices of raw materials are passed on to the customer. We cannot assure that we will be able to procure quality raw materials at competitive prices or at all. Further, any rise in prices may cause customers to delay their purchases, thereby adversely affecting our business, operations and financial condition.

4. *We have recently started the business of trading of coal.*

Our company was incorporated in the year 2008 in the name and style of M R Agriculture Private Limited. Initially our company was engaged in the business of trading of agriculture products. Our promoters saw an opportunity in trading of coal and hence decided to start trading of minerals. We started trading of coal from the financial year 2020-2021. We are still new in the business of trading coal and our promoters has not previously been involved in the same line of business. So, any wrong decision taken by the company may impact the business of company, which may result in financial loss to the company.

5. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them. Our business is dependent on our continuing relationships with our customers.*

Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. We have not entered in any agreement with our customers, we work on the basis of purchase order basis.

6. *Our inability to identify customer demand accurately and maintain an optimal level of inventory may impact our operations net sales, profitability, cash flow and liquidity adversely.*

The success, continuous and smooth operations of our business is dependent on our ability to effectively manage our inventory, to receive the timely delivery of our finished products from our suppliers, to anticipate and forecast customer demand and trends. Any error in our forecast could result in either surplus stock, which we may not be able to sell in a timely manner, or at all, or under stocking, which could affect our ability to meet customer demand. Maintaining an optimal level of relevant inventory is important to our business as it allows us to respond to customer demand effectively and to maintain a full range of products at our showrooms. Further, if our management misjudges the expected customer demand, it could adversely impact the results by causing either a shortage or an accumulation of excess inventory. Although we monitor our daily sales to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we over-stock inventory, our capital requirements will increase, and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any material mismatch between our forecast and actual sales could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation. Stock of inventory may also be impacted by disruptions faced in the transportation of our products or other adverse developments in the process.

7. *Our business is capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.*

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of working capital are required to finance the purchase or manufacturing of materials, mobilization of resources and other work on projects before payment is received from clients. Our working capital requirements may increase due to an increase in the size of our operations and the number and size of projects that are required to be executed within a similar timeframe. Our capital expenditure requirements and growth strategy thus require continued access to significant amounts of capital on acceptable terms. We cannot assure you that market conditions and other factors will permit future project and acquisition financings, debt or equity, on terms acceptable to us. Our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence, the continued success of current projects and laws that are conducive to our raising capital in this manner.

8. *Heavy dependence on our Promoters for the continued success of our business through his continuing services, strategic guidance and support.*

We are heavily dependent upon the continued services of our Promoters, along with support of our management team for the continuous success and growth of our organization. Our promoter Mr. Mahendra Ahuja is responsible for the execution of our day-to-day business affairs. Also prior to the incorporation and acquisition of the business he was running business under the proprietorship concern which have been acquired by our Company. The loss of our Promoters or failure to recruit suitable or comparable replacements could have an adverse effect on our business operations and growth strategies. For Details of our Promoters, please refer chapter titled “*Our Promoters and Promoter Group*” beginning on Page 136 of this Prospectus.

9. *Our business experiences an increase in sales during the summer season in India which lasts from March till July.*

Our business is experience significant increase in our sales during the summer season in India. In India electricity is still generated from coal, during the summer season the consumption of electricity increase across India and since maximum power plants in India operates on thermal energy, the demand for coal increases during summer seasons. Any, significant shortfall in sales or our inability to cope up with the growing demands during this period during these periods, would affect our profitability and we would experience adverse effect on our results of operations.

10. *As on date of filing of Prospectus name of our company doesn't resemble its business activities.*

Our Companies majority of revenue is from trading of coal. Our company name doesn't represent the business of trading of coal.

However, our companies present business activities of our Company are in line with the main objects, mentioned in Memorandum of Association of the Company.

There might be instances in future where by our Company may be penalised for the same which would may impact the financial position of the Company.”

For more details, please refer chapter titled “*Our History and Other Corporate Matters*” beginning on page 113 of the Prospectus.

11. *Our Registered Office are not owned by us. The same are occupied by us on a lease basis. Disruption of our rights as lessee or termination of the agreements with our lessor would adversely impact our operations and, consequently, our business.*

Our Registered Office from where we operate since the date of inception of our Company, is not owned by us. Our Company has been occupying the Registered Office located at Raipur, on lease basis through a lease deed dated April 1, 2022 entered into by our Company with our promoter, for a period of three years commencing from June 01, 2022. We believe that such transaction has been conducted on an arms-length basis, and there can be no assurance that our Company could not have achieved more favourable terms if had such transactions not been entered into with related parties. We cannot assure that our Company will be able to successfully renew the said lease agreement on expiry of the lease period. Further, we cannot assure that we will not face any disruption in respect of our rights as a lessee and that such lease agreement will not be terminated prematurely by the lessee. Any such non-renewal or early termination or any disruption of our rights as lessee may require us to vacate the premises and relocate to a new premises on terms that may not be favourable to us thereby adversely affecting our business, financial conditions and results of operations.

12. *If we fail to cost-effectively turn existing customers into repeat customers or to acquire new customers, our business, financial condition, and results of operations would be harmed.*

The growth of our business is dependent upon our ability to continue to grow by cost-effectively turning existing customers into repeat customers and adding new customers. Although we believe that many of our customers originate from word-of-mouth and other non-paid referrals, we expect to continue to acquire additional customers, all of which could impact our overall profitability. If we are not able to continue to expand our customer base or fail to retain customers, our net sales may grow more slowly than expected or decline. Our ability to attract new customers and increase net sales from existing customers also depends in large part on our ability to enhance and improve our existing products and to introduce new products and services that appeal to the customers, in each case, in a timely manner. We also must be able to identify and originate trends, as well as anticipate and react to changing consumer demands in a timely manner. The success of new products and services depends on several factors, including their timely introduction and completion, sufficient demand, and cost effectiveness. While we except improvements in the performance of our business and

operations, any flaws or dissatisfaction with the quality, pricing of products, or changes we make to our products and services or our inability to provide high-quality support to customers or help resolve issues in a timely and acceptable manner, our ability to attract and retain customers could be adversely affected. If our number of customers declines or fluctuates for any of these or other reasons, our business would suffer and lead to negative publicity of our brand.

13. The COVID-19 pandemic has had, and is expected to have, a material adverse effect on our business, financial condition, results of operations and cash flows.

In late 2019, a novel strain of coronavirus (“COVID-19”) emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, ‘stay-at-home’ orders, and enforcing remote working regulations. These measures have led to a significant decline in economic activities, and has had and is having an unprecedented effect and a significant negative impact on the global real estate industry. The impact of Coronavirus on the Indian real estate sector was stifling to the point that it brought property transactions to a near-halt when the nation went into a complete lockdown during both waves. Since then, the market has taken several strides towards recovery, and just when it seemed the revival was not far, the country is struck by another variant of the virus, Omicron. However, it is too early to predict whether the emerging variant will have repercussions on housing demand and sales or not. The impact of a new and alarming variant of the COVID-19, Omicron, on the real estate sector will be entirely dependent on the severity of the infection, and resultant announcement of lockdown / s. Health experts opine that while the Omicron variant does not seem to have manifested serious symptoms so far, nothing could be said conclusively till we have more data. The realty industry has not seen any immediate impact on site visits, new bookings and launches so far. But with Delhi Government announcing a yellow alert and UP resorting to a state-wide night curfew, we might be heading to an economic slowdown, once again. Omicron could lead to a continuation of the real estate trends reported during the previous two waves. Meanwhile, the new COVID-19 variant has raised concerns across the country, considering the spike in the number of cases in metro cities, especially Delhi, Mumbai and Chennai. We have implemented certain measures and modified certain policies in light of the COVID-19 pandemic.

14. Our business is substantially dependent on our key customers from whom we derive a significant portion of our revenues. The loss of any significant clients may have a material and adverse effect on our business and results of operations.

We derive a significant portion of our revenues from a limited number of customers which operate in the Coal Trading Industry. For the year ended March 31, 2022 our top 10 customers cumulatively accounted for approximately 96.66 % of our total revenue from operations as per the Restated Financial Statements. In the event any one or more customers cease to continue doing business with us, our business may be adversely affected. The loss of such customers may be caused mainly because of competition and technological advancements. There may be factors other than our performance, which may not be predictable, which could cause loss of customers. Further, any significant reduction in demand for our services from our key customers, any requirement to lower the price offered by these customers, or any loss or financial difficulties caused to these customers, change in relationship with the customers could have a material adverse effect on our business, result of operations, financial condition and cash flow. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

15. We operate in a highly competitive industry, which could limit our ability to grow.

As a trader of Coal providing a variety of coal such as South African Coal, Indonesian Coal, India Coal and American Coal to our clients, we compete with a range of organized and unorganized competitors, depending on the nature and location of goods provided. Such competitors collectively compete with the majority of our product. The market for traders in coal is highly competitive with few organized players and localised smaller unorganised players. Important factors affecting competition in the sector include, existing relationship with the clients, reliability, quality, price, past track record. Our competitor’s companies that may have greater financial, marketing or other resources than we do and, therefore, may be better able to compete for new work and skilled professionals. Our competitors may be willing and able to develop and provide product offerings faster or at a lower price than us. Our competitors also may affect our business

by entering into exclusive arrangements with existing or potential clients. Growing competition may result in a decline in our market share and force us to reduce our margins and revenues. There can be no assurance that we will be able to compete successfully against such competitors or that we will not lose our key employees or clients to such competitors. Additionally, we believe that our ability to compete also depends in part on factors outside our control, such as the availability of skilled resources, the price at which our competitors offer comparable services, and the extent of our competitors' responsiveness to their clients' needs. If we are unable to remain sufficiently competitive, or are unable to keep pace with them, our business and operating results will be adversely affected. For further details, refer paragraph on "Competition" under the chapter titled "***Our Business***" beginning on page 99 of this Prospectus.

16. Significant security breaches in our computer systems and network infrastructure and fraud could adversely impact our business.

We seek to protect all the computer systems and network infrastructure in our offices from physical break-ins as well as security breaches and other disruptive problems. Computer break-ins and power disruptions could affect the security of information stored in and transmitted through these computer systems and networks. To address these issues and to minimise the risk of security breaches we employ security systems, including firewalls and intrusion detection systems, conduct periodic penetration testing for identification and assessment of potential vulnerabilities and, use encryption technology for transmitting and storing critical data such as passwords. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an adverse effect on our business.

17. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. In addition, we are subject to laws and regulations relating to, among others, environmental approvals in respect of the project, minimum wages, working hours, health and safety of our labourers and requirements of registration of contract labour. Although we believe that our contractual arrangements are substantially in compliance with such laws and regulations, statutory authorities may allege non-compliance and we cannot assure you that we will not be subject to any such regulatory action in the future, including penalties, seizure of land and other civil or criminal proceedings. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled "***Key Industry Regulations and Policies***" and "***Government and Other Statutory Approvals***" beginning on page 105 and 165 respectively of this Prospectus.

18. We require several approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of "Reetech International Cargo and Courier Limited" from "Reetech International Cargo and Courier Private Limited" pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. For example, we have applied or yet to apply after our company's name was changed from Reetech International Cargo and Courier Private Limited to Reetech International Cargo and Courier Limited. Further, we require to keep already obtained valid key approvals such as Tax Registrations, IEC Code, for running our operations in a smooth manner. Further, we are also required to obtain certificate of Shops and Establishment Act License and ESIC which are yet to be applied by the Company. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Statutory Approvals**” beginning on page 105 and 165 respectively of this Prospectus.

During the time there can be changes to the national, state and local business conditions and regulatory environment, local market conditions, perception of prospective clients with respect to the convenience and attractiveness of the project and changes with respect to competition from other companies. The occurrence of these risks, if any, could result in stoppage of work along with penalty in monetary terms. Any stoppage of work may result in a delay in completing our projects leading to failure to deliver the real estate to the customers within the time frame. Further, any of the aforesaid risks may also result in our contractors compromising on the quality standards in order to finish the work within the given timelines, which may in turn affect our reputation and ability to attract new customers. If any of the above were to occur, it would significantly affect our operating results, and the slowdown of business operations may have a material adverse effect on our business operations and financial conditions.

22. *There are certain discrepancies / errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956 / 2013. 23. *Our business is manpower intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

We are in trading and our business is dependent on human resource for carrying out its operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

Further, details pertaining to amounts due towards our creditors are not available on the website of our Company. Our inability to accurately forecast the total number of MSME Creditors and total amount due to them could adversely affect our business operations and cash flows and also affect our ability to continue to manage and expand our business.

25. *Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.*

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires. Furthermore, our senior management team is integral to the success of our business. However, we cannot assure you that we will be able to retain any or all of our management team. 27. We are dependent on third party vendors for delivery of materials required to us from our suppliers and delivery of our products to our clients. Any failure on part of such vendors to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

We are engaged in the business of trading of coal. We do not own the fleet of vehicle to transport the coal from the ports to the place of delivery. Hence our company uses third party transportation. Our success depends on the smooth supply and transportation of the product delivering to our client's sites, which are subject to various uncertainties and risks. We are mainly dependent on State Government for meeting our electricity requirements. Further since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power.

Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

29. Our business may be affected by severe weather conditions and other natural disasters.

Our business activities may be materially and adversely affected by severe weather conditions, which may force us to evacuate personnel or curtail services, or suspend our operations or postpone delivery of our products to our clients. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our operations. High temperatures during summer months and the monsoon season could limit our ability to carry on our activities or to fully utilize our resources.

30. We face competition in our business from organized players, which may adversely affect our business operation and financial condition.

The market in which our company is doing business is highly competitive on account of organized players. Players in this industry generally compete with each other on key attributes such as technical competence, experience, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently

affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

32. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

33. *Major fraud, lapses of internal control or system failures could adversely impact the company’s business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company’s operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

34. *We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.*

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and / or exploring new products. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

35. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;

- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

36. *Our Company has a negative cash flow in its financing activities in the year March 31, 2022, 2021 and 2020 and investing activities in the year March 31, 2022, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Net cash (used in) / generated from financing Activities	(50.70)	(9.80)	(28.99)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations. For further details please see chapter titled “**Financial Statements as Restated**” beginning on page 145.

37. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoters and associate company. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “**Related Party Transactions**” beginning on page 143 of this Prospectus.

38. *We have applied for registration of our name and logo but do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.*

We have applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and the said application is under process and as on date we do not own the trademark. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

39. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

40. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

41. *Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

42. *Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.*

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

43. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

44. *Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.*

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

45. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “*Objects of the Issue*” beginning on page 77 of this Prospectus.

46. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and / or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and / or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

47. *Guarantees from Promoters & Director as well as others have been taken in relation to the debt facilities provided to us.*

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee / s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee / s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 158 of this Prospectus.

48. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” beginning on page 144 of this Prospectus.

49. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus.

In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

50. Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

51. Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance.

For further information, see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 158 of this Prospectus.

52. Some of the KMPs is associated with our company for less than one year.

Our Key Management Personnel, Company Secretary is associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter “*Our Management*” beginning on page 117 of this Prospectus.

53. There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

54. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and

other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

55. *Negative publicity could adversely affect our revenue model and profitability.*

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

56. *Industry information included in this Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

57. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and / or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

58. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

59. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- i. Volatility in the Indian and global capital market;

- ii. Company's results of operations and financial performance;
- iii. Performance of Company's competitors,
- iv. Adverse media reports on Company or pertaining to the agriculture Industry;
- v. Changes in our estimates of performance or recommendations by financial analysts;
- vi. Significant developments in India's economic and fiscal policies; and
- vii. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

60. You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

61. The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.

The Issue price of our equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "**Basis for Issue Price**" beginning on page 83 of this Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- a. Reports on research by analysts.
- b. Changes in revenue.
- c. Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- d. General Market Condition
- e. Domestic and International Economy.

62. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

63. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

64. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

65. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

66. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.*

As stated in the reports of the Auditor included in this Prospectus under chapter "**Financial Statements as Restated**" beginning on page 145 the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles

and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBIICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

67. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

68. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

69. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Prospectus.

While facts and other statistics in this Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "***Our Industry***" beginning on page 88 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

70. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

71. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing

guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

72. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

73. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

74. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

GLOOMY AND MORE UNCERTAIN

- A tentative recovery in 2021 has been followed by increasingly gloomy developments in 2022 as risks began to materialize. Global output contracted in the second quarter of this year, owing to downturns in China and Russia, while US consumer spending undershot expectations. Several shocks have hit a world economy already weakened by the pandemic: higher-than-expected inflation worldwide—especially in the United States and major European economies—triggering tighter financial conditions; a worse-than-anticipated slowdown in China, reflecting COVID-19 outbreaks and lockdowns; and further negative spillovers from the war in Ukraine.
- The baseline forecast is for growth to slow from 6.1 percent last year to 3.2 percent in 2022, 0.4 percentage point lower than in the April 2022 World Economic Outlook. Lower growth earlier this year, reduced household purchasing power, and tighter monetary policy drove a downward revision of 1.4 percentage points in the United States. In China, further lockdowns and the deepening real estate crisis have led growth to be revised down by 1.1 percentage points, with major global spillovers. And in Europe, significant downgrades reflect spillovers from the war in Ukraine and tighter monetary policy. Global inflation has been revised up due to food and energy prices as well as lingering supply demand imbalances, and it is anticipated to reach 6.6 percent in advanced economies and 9.5 percent in emerging market and developing economies this year—upward revisions of 0.9 and 0.8 percentage point, respectively. In 2023, disinflationary monetary policy is expected to bite, with global output growing by just 2.9 percent.
- The risks to the outlook are overwhelmingly tilted to the downside. The war in Ukraine could lead to a sudden stop of European gas imports from Russia; inflation could be harder to bring down than anticipated either if labor markets are tighter than expected or inflation expectations unanchor; tighter global financial conditions could induce debt distress in emerging market and developing economies; renewed COVID-19 outbreaks and lockdowns as well as a further escalation of the property sector crisis might further suppress Chinese growth; and geopolitical fragmentation could impede global trade and cooperation. A plausible alternative scenario in which risks materialize, inflation rises further, and global growth declines to about 2.6 percent and 2.0 percent in 2022 and 2023, respectively, would put growth in the bottom 10 percent of outcomes since 1970.
- With increasing prices continuing to squeeze living standards worldwide, taming inflation should be the first priority for policymakers. Tighter monetary policy will inevitably have real economic costs, but delay will only exacerbate them. Targeted fiscal support can help cushion the impact on the most vulnerable, but with government budgets stretched by the pandemic and the need for a disinflationary overall macroeconomic policy stance, such policies will need to be offset by increased taxes or lower government spending. Tighter monetary conditions will also affect financial stability, requiring judicious use of macroprudential tools and making reforms to debt resolution frameworks all the more necessary. Policies to address specific impacts on energy and food prices should focus on those most affected without distorting prices. And as the pandemic continues, vaccination rates must rise to guard against future variants. Finally, mitigating climate change continues to require urgent multilateral action to limit emissions and raise investments to hasten the green transition.

The Forces Shaping the Outlook

Global slowdown intensifies as downside risks materialize. A tentative recovery in 2021 has been followed by increasingly gloomy developments in 2022. Performance was slightly better than expected in the first quarter, but world real GDP is estimated to have shrunk in the second quarter—the first contraction since 2020—owing to economic downturns in China and Russia. Downside risks discussed in the April 2022 World Economic Outlook are materializing, with higher inflation worldwide, especially in the United States and major European economies, triggering a sharp

tightening in global financial conditions; a sharper-than-anticipated slowdown in China, reflecting COVID-19 outbreaks and lockdowns; and further negative cross-border effects from the war in Ukraine.

Global inflation again surprises on the upside, prompting more central bank tightening. Since 2021, consumer prices have consistently risen faster than widely expected, including in the World Economic Outlook (Figure 1). In the United States, the consumer price index rose by 9.1 percent in June, compared with a year earlier, and it also rose by 9.1 percent in the United Kingdom in May—the highest inflation rates in these two countries in 40 years. In the euro area, inflation in June reached 8.6 percent, its highest level since the inception of the monetary union. Equally concerning, in emerging market and developing economies, second-quarter inflation is estimated to have been 9.8 percent. Higher food and energy prices, supply constraints in many sectors, and a rebalancing of demand back toward services have in most economies driven up headline inflation. But underlying inflation has also increased, as reflected in different gauges of core inflation, reflecting the pass-through of cost pressures by way of supply chains and tight labor markets, especially in advanced economies.¹ Wage growth has on average not kept up with inflation across both advanced and emerging market and developing economies, eroding household purchasing power. Although long-term inflation expectations have been stable in most major economies, they have started to rise according to some measures, including in the United States (Figure 2). In response to incoming data, central banks of major advanced economies are withdrawing monetary support more assertively and raising policy interest rates faster than expected in the April 2022 World Economic Outlook. Central banks in several emerging market and developing economies have raised interest rates more aggressively than during past advanced economy tightening cycles. The associated rise in longer-term borrowing costs, including mortgage rates, and tighter global financial conditions (see box) have led to precipitous declines in equity prices, weighing on growth. At the same time, public COVID-19 support packages have been wound down.

China's economic slowdown has added to global supply chain disruptions.

COVID-19 outbreaks and mobility restrictions as part of the authorities' zero-COVID strategy have disrupted economic activity widely and severely. Shanghai, a major global supply chain hub, entered a strict lockdown in April 2022, forcing citywide economic activity to halt for about eight weeks. In the second quarter, real GDP contracted significantly by 2.6 percent on a sequential basis, driven by lower consumption—the sharpest decline since the first quarter of 2020, at the onset of the pandemic, when it declined by 10.3 percent. Since then, more contagious variants have driven a worrisome surge in COVID-19 cases. The worsening crisis in China's property sector is also dragging down sales and real estate investment. The slowdown in China has global consequences: lockdowns added to global supply chain disruptions and the decline in domestic spending are reducing demand for goods and services from China's trade partners.

BASELINE SCENARIO

Global growth: In the baseline scenario, global growth is 3.2 percent in 2022 and moderates to 2.9 percent in 2023, lower than projected in the April 2022 World Economic Outlook by 0.4 and 0.7 percentage point, respectively (Table 1). In a number of cases, a better-than-expected growth outcome in the first quarter of 2022 offsets the subsequent slowdown, resulting in a relatively modest net negative revision for average annual growth in 2022. Downgrades for China and the United States, as well as for India, are driving the downward revisions to global growth during 2022–23, which reflect the materialization of downside risks highlighted in the April 2022 World Economic Outlook: a sharper slowdown in China due to extended lockdowns, tightening global financial conditions associated with expectations of steeper interest rate hikes by major central banks to ease inflation pressure, and spillovers from the war in Ukraine. With growth near 3 percent in 2022–23, a decline in global GDP or in global GDP per capita—sometimes associated with global recession—is not currently part of the baseline scenario. However, projections for growth on a fourth-quarter-over-fourth-quarter basis point to a significant weakening of activity in the second half of 2022 (Table 1). While the revisions are mostly negative for advanced economies, differing exposures to the underlying developments mean that those for emerging market and developing economies are more mixed:

As noted, growth revisions for major advanced economies in 2022–23 are generally negative. Baseline growth in the United States is revised down by 1.4 percentage points and 1.3 percentage points in 2022 and 2023, respectively, reflecting weaker-than-expected growth in the first two quarters of 2022, with significantly less momentum in private consumption, in part reflecting the erosion of household purchasing power and the expected impact of a steeper tightening in monetary policy. Growth in the euro area is also revised down: by 0.2 percentage point in 2022, when improved prospects for tourism and industrial activity in Italy are more than offset by significant downgrades in France, Germany, and Spain; and by 1.1 percentage point in 2023.

This reflects spillovers from the war in Ukraine as well as the assumption of tighter financial conditions, with the European Central Bank ending net asset purchases and raising rates in July 2022 for the first time since 2011. In a number of European economies, NextGenerationEU funds are supporting economic activity.

For emerging market and developing economies, the negative revisions to growth in 2022–23 reflect mainly the sharp slowdown of China’s economy and the moderation in India’s economic growth. The revision in emerging and developing Asia is correspondingly large, at 0.8 percentage point in the baseline for 2022. This revision includes a 1.1 percentage point downgrade to growth in China, to 3.3 percent (the lowest growth in more than four decades, excluding the initial COVID-19 crisis in 2020), owing primarily to the aforementioned COVID-19 outbreaks and lockdowns. Likewise, the outlook for India has been revised down by 0.8 percentage point, to 7.4 percent. For India, the revision reflects mainly less favorable external conditions and more rapid policy tightening. Elsewhere, growth revisions in the baseline have been mostly on the upside. Real GDP for emerging and developing Europe is expected to shrink by 1.5 percentage points less in 2022 than predicted in the April 2022 World Economic Outlook but grow by 0.4 percentage point less in 2023, on the back of stronger-than-expected Russian export growth in 2022 and the recently announced additional sanctions on Russia in 2023. Latin America and the Caribbean has also seen an upward revision of 0.5 percentage point in 2022 as a result of a more robust recovery in the large economies (Brazil, Mexico, Colombia, Chile). The outlooks for countries in the Middle East and Central Asia and sub-Saharan Africa remain on average unchanged or positive, reflecting the effects of elevated fossil fuel and metal prices for some commodity-exporting countries. Inflation: The baseline projection for global inflation is also more pessimistic, having been revised up to 8.3 percent in 2022 on a fourth-quarter-over-fourth-quarter basis, from 6.9 percent in the April 2022 World Economic Outlook. The upside inflation revision in 2022 is larger for advanced economies, where it is expected to reach 6.3 percent from 4.8 percent projected in the April 2022 World Economic Outlook on a fourth-quarter-over-fourth-quarter basis, driven by significant increases in headline inflation among such major economies as the United Kingdom (a 2.7 percentage point upward revision to 10.5 percent) and the euro area (a 2.9 percentage point upward revision to 7.3 percent). Forecasts for 2023 are relatively unchanged—up by only 0.2 percentage point on a fourth-quarter-over-fourth-quarter basis—reflecting confidence that inflation will decline as central banks tighten policies and energy price base effects turn negative. For emerging market and developing economies, inflation in 2022 is expected to reach 10.0 percent on a fourth-quarter-over-fourth-quarter basis. Revisions for those economies display greater variation across countries, with relatively modest increases in emerging and developing Asia (partly because of a slowdown of activity in China and limited increases in prices of staple foods) but larger revisions for Latin America and the Caribbean (up by 3.0 percentage points) and for emerging and developing Europe (up by 2.9 percentage points).

INDIAN ECONOMY

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and, more recently, inflation have created particularly challenging times for policy-making. Faced with these challenges, the Government of India’s immediate response was a bouquet of safety-nets to cushion the impact on vulnerable sections of society and the business sector. It next pushed through a significant increase in capital expenditure on infrastructure to build back medium-term demand as well as aggressively implemented supply-side measures to prepare the economy for a sustained long-term expansion. This chapter explains how this flexible and multi-layered approach is partly based on an “Agile” framework that uses feedback-loops, and the monitoring of real-time data.

Advance estimates suggest that the Indian economy is expected to witness real GDP expansion of 9.2 per cent in 2021–22 after contracting in 2020–21. This implies that overall economic activity has recovered past the pre-pandemic levels. Almost all indicators show that the economic impact of the “second wave” in Q1 was much smaller than that experienced during the full lockdown phase in 2020–21 even though the health impact was more severe.

Agriculture and allied sectors have been the least impacted by the pandemic and the sector is expected to grow by 3.9 per cent in 2021–22 after growing 3.6 per cent in the previous year. Advance estimates suggest that the GVA of Industry (including mining and construction) will rise by 11.8 per cent in 2021–22 after contracting by 7 per cent in 2020–21. The Services sector has been the hardest hit by the pandemic, especially segments that involve human contact. This sector is estimated to grow by 8.2 per cent this financial year following last year’s 8.4 per cent contraction.

Total Consumption is estimated to have grown by 7.0 per cent in 2021–22 with significant contributions from government spending. Similarly, Gross Fixed Capital Formation exceeded pre-pandemic levels on the back of ramped up public expenditure on infrastructure. Exports of both goods and services have been exceptionally strong so far in 2021–22, but imports also recovered strongly with recovery in domestic demand as well as higher international commodity prices.

With the vaccination programme having covered the bulk of the population, economic momentum building back and the likely long-term benefits of supply-side reforms in the pipeline, the Indian economy is in a good position to witness GDP growth of 8.0–8.5 per cent in 2022–23. Nonetheless, the global environment still remains uncertain. At the time of writing, a new wave in the form of the Omicron variant was sweeping across the world, inflation had jumped up in most countries,

and the cycle of liquidity withdrawal was being initiated by major central banks. This is why it is especially important to look at India's macroeconomic stability indicators and their ability to provide a buffer against the above stresses. Despite all the disruptions caused by the global pandemic, India's balance of payments remained in surplus throughout the last two years. This allowed the Reserve Bank of India to keep accumulating foreign exchange reserves (they stood at US\$ 634 billion on 31st December 2021). This is equivalent to 13.2 months of merchandise imports and is higher than the country's external debt. The combination of high foreign exchange reserves, sustained foreign direct investment, and rising export earnings will provide an adequate buffer against possible global liquidity tapering in 2022-23. The fiscal support given to the economy as well as to the health response caused the fiscal deficit and government debt to rise in 2020-21. However, a strong rebound in government revenues in 2021-22 has meant that the Government will comfortably meet its targets for the year while maintaining the support, and ramping up capital expenditure. The strong revival in revenues (revenue receipts were up over 67 per cent YoY in April-November 2021) means that the Government has fiscal space to provide additional support if necessary. The financial system is always a possible area of stress during turbulent times. However, India's capital markets, like many global markets, have done exceptionally well and have allowed record mobilization of risk capital for Indian companies. More significantly, the banking system is well capitalized and the overhang of Non-Performing Assets seem to India does need to be wary of imported inflation, especially from elevated global energy prices. Overall, macro-economic stability indicators suggest that the Indian economy is well placed to take on the challenges of 2022-23. One of the reasons that the Indian economy is in a good position is its unique response strategy. Rather than pre-commit to a rigid response, Government of India opted to use safety-nets for vulnerable sections on one hand while responding iteratively based on Bayesian-updating of information. This "barbell strategy" was discussed in last year's Economic Survey. A key enabler of this flexible, iterative "Agile" approach is the use of eighty High Frequency Indicators (HFIs) in an environment of extreme uncertainty. Another distinguishing feature of India's response has been an emphasis on supply-side reforms rather than a total reliance on demand management. These supply-side reforms include deregulation of numerous sectors, simplification of processes, removal of legacy issues like 'retrospective tax', privatisation, production-linked incentives and so on. These have been discussed in detail in the respective chapters. Even the sharp increase in capital spending by the Government can be seen both as demand and supply enhancing response as it creates infrastructure capacity for future growth. This year's Survey particularly highlights the importance of process reforms in a number of sectors while Chapter 11 provides a brief demonstration of the use of satellite images and geo-spatial data, both recently deregulated sectors, for gauging economic development have structurally declined even allowing for some lagged impact of the pandemic. Vaccination is not merely a health response but is critical for opening up the economy, particularly contact-intensive services. Therefore, it should be treated for now as a macro-economic indicator. Over the course of a year, India delivered 157 crore doses that covered 91 crore people with at least one dose and 66 crores with both doses. The vaccination process for boosters and for the 15–18-year age group was also gathering pace at the time of writing. Inflation has reappeared as a global issue in both advanced and emerging economies. India's Consumer Price Index inflation stood at 5.6 per cent YoY in December 2021 which is within the targeted tolerance band. Wholesale price inflation, however, has been running in double-digits. Although this is partly due to base effects that will even out, India does need to be wary of imported inflation, especially from elevated global energy prices. Overall, macro-economic stability indicators suggest that the Indian economy is well placed to take on the challenges of 2022-23. One of the reasons that the Indian economy is in a good position is its unique response strategy. Rather than pre-commit to a rigid response, Government of India opted to use safety-nets for vulnerable sections on one hand while responding iteratively based on Bayesian-updating of information. This "barbell strategy" was discussed in last year's Economic Survey. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. - In June 2021, Finance Ministers of G-7 countries, including the US, the UK, Japan, Italy, Germany, France and Canada, attained a historic contract on taxing multinational firms as per which the minimum global tax rate would be at least 15%. The move is expected to benefit India by increasing foreign direct investments in the country.
- In June 2021, the Indian government signed a US\$ 32 million loan with World Bank for improving healthcare services in Mizoram.

- In April 2021, Dr. Ahmed Abdul Rahman AlBanna, Ambassador of the UAE to India and Founding Patron of IFIICC, stated that trilateral trade between India, the UAE and Israel is expected to reach US\$ 110 billion by 2030.
- India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23.
- The Government of India is going to increase public health spending to 2.5% of the GDP by 2022. Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution Mr. Piyush Goyal, on January 21, 2022 said that Indian industry to raise 75 unicorns in the 75 weeks leading up to the country's 75th anniversary next year.

As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus of 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates for July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with the government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third-largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to a shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass the USA to become the second-largest economy in terms of purchasing power parity (PPP) by 2040, as per a report by PricewaterhouseCoopers.

COAL TRADING INDUSTRY IN INDIA

India's domestic coal production increases by 28% as of June 16, 2022

After a record-breaking coal production of 777 million tonnes (MT) in 2021-22, domestic coal production continues to witness an increasing trend in the current financial year as well.

The total domestic coal production in 2022-23, as of May 31, 2022, is 137.85 MT, which is 28.6 per cent more as compared to the production of 104.83 MT in the same period of last year. This trend is being maintained in June, 2022 also, the Ministry of Coal said today.

The coal production by Coal India Ltd (CIL) is 28 per cent more than the production in the same period of the previous year (as of June 16, 2022). The Domestic coal production target for the current financial year is 911 MT which is 17.2 per cent more than the previous year.

The coal imports for blending by the Domestic Coal Based (DCB) power plants have dropped to 8.11 MT in the year 2021-22 which has been the lowest coal import in the last eight years. This was possible solely due to the robust coal supply from domestic sources and increased domestic coal production. The Imported Coal Based (ICB) power plants had imported coal of more than 45 MT per year from 2016-17 to 2019-20. However, coal import by the ICB power plants dropped to the lowest level of 18.89 MT in 2021-22 and the generation from these plants also dropped to 39.82 billion units (BU) in the year 2021-22 as compared to the 100+ BU which these plants have been generating since quite some time. This year too their generation remains very low due to high price of imported coal.

In the last five years, the coal-based power generation has grown at a CAGR of 1.82 per cent whereas the domestic coal supply to power sector had grown at a CAGR of 3.26 per cent. Thus, coal supply to power sector has outpaced the growth in coal-based power generation and continues to do so in the present year too.

In the year 2021-22, coal supply from CIL to the DCB power plants has been more than the supply required to be made under Fuel Supply Agreement (FSA). CIL had supplied 540 MT coal, out of which 483 MT coal was supplied against FSA. This coal was sufficient for the power plants to run at 69 per cent PLF whereas the DCB power plants operated at a PLF of only 61.3 per cent in the year 2021-22. In the year 2022-23, as per FSA, CIL was supposed to supply 120.67 MT coal to its linked power plants (at 85 per cent PLF) whereas CIL had supplied 129.58 MT coal (till 16.06.22). This supply is 7.4 per cent more than the supply required by the plants if they operate at 85 per cent PLF. The plants have operated at about 70 per cent PLF and the CIL coal supply to its FSA-linked plants is 30.4 per cent more than their requirement.

With increased production, the rake supply from CIL to the power sector has also been at an all-time high. The rake loading to power sector increased from 215.8 rakes per day in 2020-21 to 271.9 rakes per day in 2021-22, registering a growth of 26 per cent.

In the current year also (till June 16, 2022), the rake supply from CIL to power sector has increased by 25 per cent as compared to the same period of last year. At the same time, coal stocks at pit head power plants are much higher than the distant plants.

The DCB power plants have generated a record high power of 3.3 BU per day in the month of June 2022 (till June 16, 2022). The coal stock at the DCB power plants during this period, however, have not depleted, rather the same has increased from 21.85 MT (as on June 1, 2022) to 22.64 MT (as on June 16, 2022). This reflects the robust coal production and sufficient supply to keep up with the increasing demand. The coal stock is sufficient for more than 10 days' requirement.

As on June 16, 2022, coal stock at different domestic coal mines is more than 52 MT, which is sufficient for about 24 days requirement of power plants. In addition to it, about 4.5 MT coal stock is available at various Goodshed sidings, Private Washeries and ports and is awaiting to be transported to the power plants. During the monsoons, despite having high coal stock at mine ends, the coal companies face problems in transporting coal to the sidings due to flooding of mines and the wet coal jamming the Coal Handling Plants conveyor systems.

Even by end of the second quarter, coal stocks remain high at CIL mines when stocks are low at thermal plant end. There domestic coal production is not an issue. The coal supplies from CIL are more than the FSA requirements. However, CIL has agreed to import coal for the interested power sector consumers (State Gencos and IPPs) and have floated a short-term tender for 2.4 MT imported coal for supply within three months and two long term imported coal supply tenders of 6 MT each for supply over a period of one year. The ICB power plants and the Gas based power plants have been operating at very low capacities due to constraints in easy availability of required fuel and issues related to PPAs. However, coal supplies from CIL and other domestic sources is sufficient to ensure that there is adequate coal at the power plants during the monsoon season.

MARKET SIZE

Indian coal reserves are the third largest in the world, after the United States and China. India is the third largest coal producer in the world and the eighth largest importer. With annual production of 310 million tonnes and imports of almost 25 million tonnes, coal provides one-third of energy supply in India.

The Indian government forecasts huge increases in electricity capacity based on coal. Massive increases in coal supply would be required if these plans are realised, although it is not clear if they are feasible. The principal objective of Indian coal policy should be to improve the financial performance of the industry by creating a freely competitive coal industry. A financially viable electricity industry will be necessary to support reforms in the coal industry.

This report describes the Indian coal sector, and comments on government policies and the performance of India's largely state-owned coal companies. There is a substantial need for reforms in India's coal sector to improve efficiency and competitiveness.

INVESTMENT / MAJOR DEVELOPMENT

The investment quantum globally on coal supply chains is expected to grow by 10 per cent year-on-year to around \$115.5 billion in the current calendar year, with China and India accounting for a major share, International Energy Agency (IEA) has said. “Around \$105 billion was invested in the coal supply chain in 2021, an increase of 10 per cent year-on-year, and a further 10 per cent rise is expected in 2022 as tight supply continues to attract new projects. This is a long way from the market situation implied by international climate goals and the Glasgow commitment to phase down coal. This increase is being led by China and India, the dominant players in global coal markets,” IEA said in the World Energy Investment report 2022. Coal shortages and power rationing in China in 2021 made energy security the main priority in near-term Chinese policy, and more than 350 million tonnes (MT) per year of new coal mining capacity was brought on stream in the second half of the year. India is also looking to increase domestic coal supply in the face of a squeeze in 2022 that increased the use of more expensive imported coal, it added. “Given the unprecedented rise in coal prices in 2022, a key question is whether this will trigger a new wave of investment in the coal supply chain. Outside China and India, it is not clear that such an increase in investment will take place,” the annual report said. The report explained that the global coal supply investment is expected to grow by another 10 per cent in 2022 as tight supply continues to attract new projects. “At over \$80 billion, China and India are anticipated to make up the bulk of global coal investment in 2022,” it added. IEA said that India, the world’s second-largest consumer and coal producer, is seeking to increase coal production as its energy needs grow and the government looks to decrease imports. This is particularly the case because a supply squeeze in 2022 increased the use of more expensive imported coal. State-run monopoly Coal India, which accounts for over 80 per cent of the national output, has a target to reach 1,000 MTPA production in the coming years, while also investing in washing plants and rail corridors. Other players include public companies (SSLC and NLC), captive producers and mine developer-operators (MDOs) who are increasingly working for Coal India, the report pointed out. Under the Indian government’s Coal Mines (Special Provisions) Act, merchant producers can sell coal at free-market prices outside CIL’s monopoly. The first auction for commercial mining blocks was awarded in November 2020, with 19 mines allocated, representing over 3 billion tonnes of coal reserves and a peak capacity of over 50 MTPA.

“A number of additional auction rounds have been launched since. There is uncertainty about how rapidly private producers can navigate the approval process and the pace of development of the production capacity, but current high coal prices are likely to provide a strong incentive,” IEA said.

The establishment of Coal Trading Exchange in the country shall open up the coal market through an online trading platform and provide easy coal availability in the market.

MoC is contemplating to activate the already existing Non-statutory Coal Regulator and to merge CCO with the existing Coal Regulator to create an independent expert institution which besides having technical expertise can also command confidence of the private sector. Proposal has been submitted for consideration of Secretary (Coal) and a review meeting to discuss the options of Coal Pricing Reforms was chaired by Secretary (Coal) on 14.01.2022. CIL was asked to explore and submit study of reorganizing Coal grades with tolerance provision of 50-100 GCV. A follow up review meeting was held on 25.02.2022, where CIL submitted its study stating that the aforementioned provision is not financially beneficial to them. CIL has been asked to re-conduct the study by increasing the no. of years for which data is analyzed. CIL has submitted its presentation by increasing the base year to two years i.e. 2019-20 and 2020-21. Even in this analysis CIL is incurring revenue loss by opting for tolerance provision with no significant decrease in Grade slippage.

IMPACT OF COVID-19 ON OUR BUSINESS

In late 2019, a novel strain of coronavirus (“COVID-19”) emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, ‘stay-at-home’ orders, and enforcing remote working regulations. These measures have led to a significant decline in economic activities, and has had and is having an unprecedented effect and a significant negative impact on the global travel industry. An individuals’ ability to travel has been curtailed through border closures across the world, mandated travel restrictions and limited operations of hotels, airlines, bus and railways, and may be further limited through additional voluntary or mandated restrictions on travel. The measures implemented to contain the COVID-19 pandemic have had, and are expected to continue to have, a significant negative effect on our business, financial condition, results of operations, cash flows and liquidity position. Further, no prediction can be made of when any of the restrictions currently in place will be relaxed or when further restrictions will be announced. Although some governments are beginning to ease or lift such restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown.

Phased implementation of Unified Payments Interface

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effective from October 15, 2020 (the “FDI Policy”), which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors / activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions. For details, see “**Key Regulations and Policies**” beginning on page 105 of this Prospectus.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.

The above information is given for the benefit of the Applicants. Our Company, the Selling Shareholders and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus.
